BE NATURALLY EMPOWERED! A NEW OUTLOOK, NEW SKIN, NEW YOU

Why do we wait until we notice the first sign of wrinkles? That first laugh line, crow's feet and multiple forehead creases has us surfing the net for the latest greatest clock-stopping cream, gel and lotion. What ever happened to a proactive advantage? Why not start now before the changes and not later?

Why do we continue to use chemically developed potions advertised to stop the effects of aging? Ponder this...While the chemicals are stopping the aging are their any other negative effects to your skin?

Could the combination of chemicals be detrimental at all?

The reason we advocate natural ingredients is because with all natural there are no adverse side effects. Mainstream companies tell us what symptoms their product will cure, but with the slight of the hand they don't explain all the other negative effects the product will have on our skin.

All Natural has no adverse side effects. It combats, corrects and feeds continuously. Why take chances with all that you don't know. What happens when you combine several chemicals? How long do you use it before you show signs of stress to your skin? 10, 20, 30 years? Well, all natural products have no chemicals and actually helps to revitalize new cells, new skin growth, and helps your skin appear youthful.

Be Naturally Empowered! A new outlook, new skin will lead to a new you.

Special Points of Interest

- Exercise is a great anti-aging element. It can help regulate blood pressure, improve circulation, decrease stress levels and help you keep a healthy heart. Simply walking, stretching and moving your arms with each step can satisfy your body's need for revival.
- Did you know doctors recommend less food and smaller portions as we age? Increase your fiber intake, flush your system with lots of water, fresh vegetables and don't forget your essential vitamins and minerals.

This Month's

Spotlight Spotlight

[Wrinkle Reducing Wild Yam Eye Treatment](#)... This product has become the newest hormone of choice. Easily penetrated and absorbed by the skin, the Wrinkle Reducing Wild Yam Eye Treatment increases the amount of fat cells and adds fullness. Wild Yam is known for its hormonal effects and when applied to certain areas on the body it produces an estrogenic effect - Younger looking skin.

And although we have not advertised this benefit, many customers tell us that it's excellent for keeping lips smooth and soft.

[Sweet Almond Lifting Serum](#)... Controls the appearance of fine lines and wrinkles. This product also helps to combat oxidation. It is easily absorbed to make skin appear smoother and youthful.

- ✓ A great product to use in the morning to smooth on under makeup
- ✓ Useful after a workout at the gym to relax facial muscles and reduce redness
- ✓ Can benefit you greatly after exposure to sun, especially after a day at the beach or the park

Eco-Friendly without a Footprint

Bonita Botanicals is proud to announce that we only use eco-friendly products that leave no carbon footprint. We believe in decreasing energy demands and carbon consumption and embrace the whole effect of living in a green world.

We hope to create a positive approach that influences all of our customers and those companies that come in contact with Bonita Botanicals. Be Naturally Empowered!
